Company Introduction

Utilizing patented cutting edge microprocessor technology, **PULSARLUBE®** provides the most innovative and reliable Automatic Single Point Lubricator on the market. Backed by years of research and development PULSARLUBE offers a wide range of superior products to meet the needs of our customers.

PULSARLUBE provides high quality products and services worldwide through its well-established distribution network.

provides its customers with the highest quality assurance as well as continuous innovation to its cutting edge technology for the best lubrication solutions.

2012

- Invention of Pulsarlube E & passed IECEX/ATEX/UL Certification

2014

- Invention of Pulsarlube Mi

2016

- Launch of Customized Lubricant Business

2018

- Invention of electromechanical Pulsarlube EXPL
- Invention of Pulsarlube BT

2013

- Foundation of Sales Office in Shanghai, China

2015

- Invention of Pulsarlube PLC

2017

- Invention of Pulsarlube EXP

2019

- Invention of Pulsarlube AIR

Is Your Equipment Well Maintained?

Many organizations are aware that excellent lubrication is a crucial step and a good investment to optimize machinery life. However in reality, the lubrication budget is often treated as secondary and is frequently one of the first areas for budget cuts. It can be difficult to find the right way, the right time, and the right amount to lubricate while determining what the “best lubrication solution” is for your machinery because optimum lubrication practices require skill, time, manpower, and money. PULSARLUBE offers a variety of lubrication products to solve all of your lubrication needs.

We Provide The Best Lubrication Solutions For Your Machinery

Accurate automatic lubrication can extend bearing life which will reduce replacement/repair cost and avoid unnecessary downtimes.

Disadvantages of Manual Lubrication

Excessive Lubrication

Hazardous Working Sites

Insufficient Lubrication

High Labor Cost

Advantages of Automatic Lubrication

Proper Lubrication

Safe Working Sites

Precise Lubrication

Long-term Cost Benefits

Pulsarlube is the most effective solution to lubricate your equipment.

Pulsarlube Automatic Lubricators: A Variety of Lubrication Solutions for Most Applications and Environments

Pulsarlube lubricators demonstrate definitive advantages over the competition.

High Operating Pressure

High operating pressures enables customers to have a variety of installation methods and options.

10m

Up to 10m (33ft) for
single point remote installations.

8 points

Up to 8 lube points for
multi-point lubrication.

Wide Temperature Range

Our technology offers benefits in a wide range of ambient temperatures.

N₂

Inert nitrogen gas is less affected by
changes in ambient temperature.

Lithium Battery

Optional lithium battery offers excellent
performance in low temperatures.

Pulsarlube offers a variety of solutions that can significantly increase your bottom line.

Pulsarlube Product Line

Total Lubrication Solutions

Pulsarlube **E**

Features

Intrinsically Safe, Compact,
Economical, Submersible

Replacement Method

Disposable

Operating Pressure

Max. 5bar (73psi)

Grease Pouch Capacity

60/120/240ml

Electrochemical

Pulsarlube **V**

Features

Intrinsically Safe, LCD Display, Advanced
Microprocessor, Controlled Gas Generation

Replacement Method

Disposable

Operating Pressure

Max. 5bar (73psi)

Grease Pouch Capacity

125/250ml

Pulsarlube **M**

Features

High Operating Pressure, Multi-Point Lubrication
Capabilities, and Low Temp Capabilities

Replacement Method

Service Pack Replacement

Operating Pressure

30~60bar (435~870psi)

Grease Pouch Capacity

60/125/250/500ml

The Pulsarlube E has the **highest IP Rating** which makes it the perfect choice for your underwater application.

IP68 IECEx

Pulsarlube E

Compact & Economical

The Pulsarlube E features compact size which can easily be installed in confined areas with limited accessibility. This eco-friendly product is recyclable.

Features & Benefits

Compact design is convenient for use in very confined spaces & Specially designed to endure high vibration

Eco-friendly product where applicable parts can be disposed of separately

CE, ATEX, UL certified for intrinsically safe use in hazardous locations

High IP rating protects against ingress of dust and water and allows underwater installation

Specifications

Grease Pouch Capacity

60ml/120ml/240ml (disposable)

Operating Method

Electrochemical reaction (Nitrogen gas)

Operating Pressure

Max. 5bar (73psi)

Operating Temperature

-20°C~55°C (-4°F~131°F)

Dispensing Periods

1, 3, 6, 9, 12 month

Remote Installation

Max. 1m (3.3ft) with O.D. Ø8 tube

Multi-Point Installation

N/A

IP Code

IP68

Product Certifications

E120 : Ø77(3.03") x 111mm(4.37") (H)

E240 : Ø77(3.03") x 156mm(6.14") (H)

Applications

The Pulsarlube V is **intrinsically safe** and can be used in **hazardous locations** containing flammable liquids, vapors, gasses, and dust.

IP68

IECEX

Pulsarlube V

Advanced Performance & Smart Operation

The Pulsarlube V is an easy-to-program gas type lubricator which offers a large user-friendly LCD display.

Features & Benefits

Variable dispensing settings with a large informative LCD display & Easy to reprogram at any time with a press of a button

8-bit microprocessor controlled to ensure the most accurate dispensing rate

CE, ATEX, UL certified for intrinsically safe use in hazardous locations

High IP rating protects against ingress of dust and water and allows underwater installation

Applications

Pulsarlube M

Unrivalled Power & Long-Term Reliability

The Pulsarlube M consists of a vertical feed pump and a microprocessor chip allowing an average operating pressure of 30bar (435psi). It is designed to ensure reliable lubrication and is a lubrication cost savings solution.

Specifications

Grease Pouch Capacity

60ml (pre-set)
125ml/250ml
(capacity setting available)
500ml (pre-set)

Power Supply

DC 4.5V Battery Pack

Operating Pressure

M60, M125 : Ø91(3.60") x 181mm (7.13") (H)
M250 : Ø91(3.60") x 210mm (8.27") (H)
M500 : Ø92(3.62") x 260mm (10.23") (H)

Applications

Features & Benefits

30bar	High output pressure enables multi-point lubrication up to 8 points or over 30ft single point lubrication
-40°C	Covers low temp applications with use of lithium battery pack
LCD	Easy to program with built-in LCD and simple button controls
Service Pack	Substantial savings with the use of replaceable grease pouches and battery packs

Service Packs

Substantial Cost Savings

Pulsarlube electromechanical lubricators are reusable and bring cost saving benefits to customers with the use of a replacement kit, the Service Pack.

A Service Pack consists of

A grease pouch of selectable lubricant type in various volumes

An OEM battery pack :

DC 4.5V Alkaline battery pack (standard) or DC 4.5V Lithium battery pack

* Note : A battery pack is not included in MSP and PLC service packs.

A disposable dust cover :

PVC dust cover (standard) or U/V protection dust cover

* Note : A dust cover is not included in PLC service packs.

Warning

The grease pouch and battery pack must always be replaced together at the end of each lubrication cycle to ensure reliable operation.

Service Pack Sizes (Grease Pouch Capacity)

60ml	120/125ml
	
240/250ml	480/500ml
	

Battery Pack Selection Guide

Applications	Alkaline Battery Pack (Standard)	Lithium Battery Pack (Optional)
Direct Mount	OK	OK
Operating Temp Range	-15°C~60°C (5°F~140°F)	-40°C~60°C (-40°F~140°F)
Programming	Up to 12 months	Up to 24 months
Remote Installation	Up to 3m (10ft) on a single line	Up to 6m (20ft) per line
Multi-Point Lubrication	Up to 8 points with max. 250ml capacity	Up to 8 points for all capacities
500ml Grease Pouch	Direct mount or short single point remote installation only	All types of installations

Globally certified electromechanical lubricator for reliable lubrication in areas containing flammable medium.

Pulsarlube EXP/EXPL

Globally Certified for Use in Hazardous Areas

The Pulsarlube EXP/EXPL is specifically designed and certified for protection against explosive gases or dust existing in hazardous locations.

Features & Benefits

Easy to check LCD display with backlight function

Reliable lubricator certified for safe use in hazardous areas

High operating pressure allows superior performance in its class

Substantial savings with the use of replaceable grease pouches and battery packs

* For replacement kit information, please refer to Service Pack on Page 15.

Cross Section

Product Dimension

MS60, MS125 (MSP60, MSP125) : Ø91(3.60") x 181mm (7.13") (H)
MS250 (MSP250) : Ø91(3.60") x 210mm (8.27") (H)
MS500 (MSP500) : Ø92(3.62") x 260mm (10.23") (H)

Applications

Features & Benefits

Synchronized	Dispenses a preset amount of lubricant only when the equipment is in operation to prevent over lubrication
30bar	Robust operating pressure allows multi point lubrication up to 8 points, 20ft remote install per point
LCD	Easy to read LCD displays critical information
Service Pack	Substantial savings with the use of replaceable grease pouches and battery packs

MS & MSP Product Selection

The MS and MSP units both synchronize to machinery but are engineered differently in order to meet customer's specifications for their equipment. The MS unit turns On or Off through a relay box in accordance with the related equipment's power signal. The MSP unit connects to a power supply (VAC or VDC) that is connected to an electrical control panel.

Pulsarlube MS

Uses a battery pack as its power source.

MS+Relay Box+Service Pack

- * Battery pack has to be replaced along with grease pouch.
- * The Pulsarlube MS is not an externally powered unit.

Pulsarlube MSP

Uses external power as its power source.

MSP+Power Supply (VAC or VDC)+Service Pack

- * An initial battery pack is included in the MSP as a backup power source to store data when power is shut off. The battery pack in the MSP does not need to be replaced for up to 5 years.
- * The Pulsarlube MSP is also available for oil (MSP-OL500).

MS Relay / MSP Power Supply Specification

	MS	MSP	
	Relay	VAC	VDC
Voltage Rate Input Range	AC100~480V, 0.5W/50~60Hz	100~220V	12~24V
Voltage Rate Output Range	Signal (Open collector type)	5.0V, 2A	
Power ON Indicator	Red LED on Relay Box or Power Supply		
Relay Box Dimensions	85mm (D) × 49mm (W) × 32mm (H)		
Wire Length	From Lubricator : 90mm Input from Relay Box/Power Supply to lubricator : 1m (3.3ft) Output from Relay Box/Power Supply to equipment : 4m (13ft)		

Pulsarlube Mi

Synchronize Operation to Vibration

The Pulsarlube Mi operates only when machine operates by detecting vibration on the installed application.

* For replacement kit information, please refer to Service Pack on Page 15.

Features & Benefits

Vibration Sensor	Vibration sensor allows the unit to lubricate only when the application is operating
Easy Installation	No need for external electric wiring or other power cables
Service Pack	Substantial savings with the use of replaceable grease pouches and battery packs
Simple & Precise	Simple to operate & dispenses precise amounts of lubricant reliably

Applications

PETROCHEMICAL PLANTS

CLEAN ROOMS

HVAC SYSTEMS

ELECTRIC MOTORS

COOLING TOWERS

Pulsarlube PLC

PLC Controlled & High Performance

The Pulsarlube PLC is specially designed to be fully integrated with a PLC system and offered in two types; MONTH and INTERVAL type.

* For replacement kit information, please refer to Service Pack on Page 15.

Features & Benefits

PLC Control	Programmed to operate upon receiving a signal from the PLC
Convenience	Sends a signal to external alarm when encountering excessive backpressure or when dispensing cycle is completed
Connectivity	Both NPN and PNP connections are available
Flexibility	MON type dispenses at preset intervals and rates depending on the monthly setting selected INT type dispenses on command when a signal is received from the PLC, at the rate selected by the user

Remote Installation

Max. 6m (20ft) with O.D. Ø4 tube

Multi-Point Installation

Max. 3m (10ft) with O.D. Ø4 tube
(Up to 4 lube points)

Oil Viscosity Range

10~10,000 cSt @ 40°C

* Special instructions available on user manual for low viscosity oils (10~100cSt@40C)

Cross Section

Product Dimension

OL500 : Ø94 (3.70") x 229 mm (9.02") (H)

Features & Benefits

Cost Savings	Refillable oil reservoir and multi-point lubrication capability
Adaptability	Able to handle a wide range of oil viscosity
LCD	Easy to program with built-in LCD and simple button controls
Easy to Refill	Refillable on-site

Applications

ESCALATORS

CHAINS

Pulsarlube E0

Highly Cost Effective Gas Type Oiler

The Pulsarlube E0 is a low-cost oil lubrication solution which utilizes a non-return valve (NRV) to allow reliable lubrication while minimizing oil leaks.

Features & Benefits

NRV	Specially designed non-return valve (NRV) allows the unit to be installed in any position minimizing oil leak
Compact Design	Compact size is convenient for use in confined spaces
Durability	Engineered to withstand high vibration
Eco-Friendly	The components of Pulsarlube E0 can be disposed of and recycled separately conforming to local regulations

1, 3, 6, 9, 12 month

Remote Installation

Max. 3m (10ft) with O.D. Ø4 tube

Multi-Point Installation

N/A

Product Certifications

ATEX, UL, IECEx, KCs, CE, MSHA

Oil Viscosity Range

10~10,000 cSt@40°C

* Special instructions available on user manual for low viscosity oils (10~100cSt@40C)

Cross Section

Product Dimension

E060 : Ø77(3.03\") x 91mm (3.58\") (H)
E0120 : Ø77(3.03\") x 111mm (4.37\") (H)
E0240 : Ø77(3.03\") x 156mm (6.14\") (H)

Applications

ESCALATORS WIRE ROPES CHAINS

Pulsarlube S

Unique & Ingenious Design

The Pulsarlube S is an advanced spring type lubricator that operates with the spring at the bottom and an upward piston movement, which dramatically reduces the effects of oil separation that have plagued traditional spring type lubricators.

Specifications

Grease Pouch Capacity 100ml (refillable)	Remote Installation N/A
Operating Method Spring	Multi-Point Installation N/A
Operating Pressure N/A	
Operating Temperature -23°C~121°C (-9°F~250°F)	
Dispensing Periods 5 Dial Settings	

Cross Section

Product Dimension
S100 : Ø67 (2.64") x 129mm (5.08") (H)

Features & Benefits

Design	The upward piston movement reduces oil separation and the possibility of grease hardening
Control Knob	Grease dispensing rate can be easily controlled by using the control knob
Reuse	Easy to refill grease on-site using grease nipple
Pre-Filled	Available pre-filled due to strategically placed piston clamps

Applications

Pulsarlube Installation Options

Direct Mount

Single Point Remote Installation

Multi-Point Installation

Direct Mount

Prior to installing your lubricator, please refer to our full accessories list on the website to order necessary parts for your application.

Reducer	Socket	45° Elbow	90° Elbow	Pipe
				

Single Remote & Multi-Point Installation

Frequently used installation parts that are necessary to install Pulsarlube lubricators/oilers are packaged in a single assembly kit for your convenience. The kits are designed to meet all relevant standards. Please refer to the complete assembly kits chart below to order the right kit for your application. If further assistance is needed, please contact your local supplier.

Installation Kit Type		Gas Type Lubricator		Mechanical Lubricator
		E	V	M, EXP, EXPL, MS, MSP, BT, Mi, PLC

Check Points	<ul style="list-style-type: none"> ☑ Read the user manuals prior to installation and follow instructions carefully for appropriate installation of Pulsarlube products. ☑ Please check compatibility between the grease previously used in machinery and the grease contained in the Pulsarlube lubricator and tubing. ☑ Please check that fitting connections are tight and that the bearing passageway is clear before installation. ☑ Units installed with 45° & 90° elbow adapters in confined areas should be handled and replaced with care. ☑ Do not install units in areas where they may fall and cause injuries. ☑ Take tube length, tube I.D., and backpressure at the lube point into consideration for remote installation. ☑ For optimal results in multi-point installation, please consider the following : <ul style="list-style-type: none"> ① Minimize operating pressure (backpressure from tubing + backpressure from divider block + backpressure from bearing) ② Use lower NLGI grade grease (NLGI#1 grease is recommended). ③ Keep lube points (maximum up to 8 points) and tubing length to a minimum. ④ Regular check-ups of dispensing conditions are required if using a divider block or oil distributor. 											

Pulsarlube Dispensing Recommendations

Below are some general guidelines for bearing lubrication requirements. Testing is recommended for specific applications. Please contact your local distributor should you need any assistance in setting proper dispensing rates.
